

Governing the Energy Transition in Europe: the way towards 2030 and 2050

THURSDAY, 14TH MARCH 16:00 -17:45

LOCATION: RENEWABLE ENERGY HOUSE, STABLE ROOM, RUE D'ARLON 63, BRUSSELS

European countries are shaping their energy policies towards 2030 and 2050 while the regulation on the governance of the energy union and climate action came into force in December 2018. In this context, the Horizon 2020 funded project, ENABLE.EU, provides examples of national progress and bottlenecks observed towards achieving the energy transition in European countries. This workshop aims at presenting fieldwork led in a selection of countries and discussing with the audience policy options that could enable progress towards a low-carbon economy.

AGENDA

- 16:00 – 16:15 Introduction by Lukasz Kolinski, Head of Unit, DG ENER
The Energy Union Governance regulation: what is the framework and the context?
- 16:15 – 17:00 What are the national governance barriers to the energy transition?
Case studies from France, Bulgaria and Ukraine
- Todor Galev (Senior Analyst, Economic Program, Center for the Study of Democracy, Bulgaria)
 - Emilie Magdalinski (Research Fellow, Jacques Delors Institute, France)
 - Vitalii Martyniuk (Acting Executive Director Centre for Global Studies – Strategy XXI, Ukraine)
- 17:00 – 17:45 World Café: Interactive discussions on policy implications

Facilitation by Thomas Pellerin-Carlin, Head of the Jacques Delors Energy Centre, Jacques Delors Institute
